

Cristhian Núñez Ramos

Curriculum Vitae

1. Education

- 2021–2025 **Ph.D. in Mathematics**, *Pontificia Universidad Católica de Chile*, Santiago-Chile.
Title of Thesis: Symplectic Hamiltonian Discontinuous Galerkin Methods for Shallow Water Equations. Advisor: Manuel A. Sánchez
- 2021–2023 **Master in Mathematics**, *Pontificia Universidad Católica de Chile*, Santiago-Chile.
- 2015–2018 **Master in Optimization**, *Escuela Politécnica Nacional*, Quito-Ecuador.
Title of Thesis: Numerical Simulation of Free Boundary Bingham Fluids. Advisor: Pedro Merino
- 2009–2014 **Bachelor in Pure Mathematics**, *Escuela Politécnica Nacional*, Quito-Ecuador.
Title of Thesis: A Proper Orthogonal Decomposition for the Fisher Equation. Advisor: Pedro Merino

Additional Graduate Education:

- 2025–present **Master of Education in Higher Education Teaching and Research (in progress)**, *Universidad Estatal de Milagro*, Guayas-Ecuador.

2. Areas of interest

My research focuses on Numerical Analysis of Partial Differential Equations, particularly Finite Element Methods. Specifically, I am interested in Discontinuous Galerkin Methods, Hybridizable Discontinuous Galerkin Methods, and the development of novel numerical methods for Hamiltonian systems that preserve key physical invariants in long-term simulations. Additionally, my interests extend to the optimal control of PDEs, with applications in mathematical modeling, computational physics, and Engineering problems requiring accurate and robust simulations.

3. Research Experience

- 2024 **Researcher (Internship)**, *School of Mathematics, University of Minnesota*, Minneapolis, United States.
Developed numerical methods for solving the vector Laplacian equation.
- 2021–2025 **Ph.D. Student**, *Facultad de Matemáticas, Pontificia Universidad Católica de Chile*, Santiago, Chile.
Developed novel numerical methods for shallow water equations.
- 2015–2016 **Researcher**, PROYECTO DE INVESTIGACIÓN MÚLTIPLE E INTERDISCIPLINARIO. *Centro de Modelización Matemática, Escuela Politécnica Nacional*, Quito, Ecuador.
Developed and analyzed mathematical models and algorithms for viscoplastic fluid simulations.

2015–2016 **Researcher**, PROYECTO DE INVESTIGACIÓN MÚLTIPLE E INTERDISCIPLINARIO. *Instituto Geofísico del Ecuador, Escuela Politécnica Nacional*, Quito, Ecuador.
Designed algorithms for image classification and modeling of volcanic lava and viscoplastic flows.

4. Academic Appointments

2025–2026 **Postdoctoral Associate**, *University of Minnesota*, Minneapolis, USA.

Mentor: Bernardo Cockburn.

We are developing post-processing techniques for elliptic problems that systematically enhance the quality of approximations produced by Galerkin methods by exploiting hidden properties of the governing equations.

5. Published Papers (Refereed Journals)

1. P. M. Merino and C. A. Núñez. Numerical Simulation of Free Boundary Biviscous Fluids. *Bull. Comput. Appl. Math. (Bull CompAMa)*, 12(2), 163–188, 2024.
2. C. Núñez and M. A. Sánchez, Symplectic Hamiltonian hybridizable discontinuous Galerkin methods for linearized shallow water equations, *Comput. Methods Appl. Mech. Engrg.*, 447 (2025), Paper No. 118383, 19 pp.

6. Submitted Manuscripts

1. B. Cockburn, C. Núñez, and M. A. Sánchez, *HDG Methods for the two-dimensional Vector Laplacian*, submitted for publication, arXiv:2604.05373, 2026.
2. C. Núñez and L. Navarrete-Vaca, *Functional Integration of Learning Analytics and Feedback in Higher Education*, submitted to the VII International Congress on Education (CIE 2026).

7. Manuscripts in Preparation

1. *Turbo post-processing for mixed methods for one-dimensional elliptic problems* with Bernardo Cockburn.
2. *A POD–Galerkin reduced-order model for the optimal control of the Fisher equation.*
3. *Regularization-based approach for solving the shallow water equations with Bingham viscoplastic flows using discontinuous Galerkin methods*, with Sofía López y Felipe Fernández.
4. *Symplectic Hamilton–HDG methods for nonlinear shallow water equations* with Manuel Sánchez.

8. Regional Journal Publications

1. Núñez Ramos, C. A., & Villacís Tulcán, N. E. (2025). Simulation of an optimal control of the epidemiological reservoir–people model. *Matemática (ESPOL–FCNM Journal)*, 23(2).
2. Navarrete Vaca, L., & Núñez Ramos, Cristhian (2025). Control and communication in dialogue: controllability, observability, and bang–bang dynamics. *Selecciones Matemáticas*, 12(2), 365–374. <https://doi.org/10.17268/sel.mat.2025.02.08>
3. Núñez Ramos, C. A., & Pizanan Cárdenas, C. H. (2026). Optimal control of the Fisher equation: a comparison of steepest descent and quasi-Newton methods. *Matemática (ESPOL–FCNM Journal)*, 24(1).
4. Navarrete-Vaca, L. T., & Núñez-Ramos, C. A. (2026). *Comunicación educativa, análisis del aprendizaje y retroalimentación en educación superior: una revisión integradora desde una perspectiva dinámica y sistémica*. *Research Club Scientia*, 4(3). <https://doi.org/10.65415/7mgmvd11>

9. Presentations

- August 11–15, 2025 **XII International Congress on Applied and Computational Mathematics (XII CIMAC)**, *Universidad Nacional del Altiplano*, Puno, Perú.
Oral presentation: “HDG Methods for the two-dimensional Vector Laplacian Equation”
- March 25–28, 2025 **1st Heidelberg–Chile Workshop on Scientific Computing**, Santiago, Chile.
Poster presentation: “Hybridizable Discontinuous Galerkin Methods for the Vector Laplacian Equation”
- March 17–20, 2025 **IACM Computational Fluids Conference (CFC)**, Santiago, Chile.
Oral presentation: “Symplectic Hamiltonian HDG Methods for Linearized Shallow Water Equations”
- June 12–14, 2024 **Conferencias Colombianas de Matemáticas Aplicadas e Industriales (MAPI3)**, Bucaramanga, Colombia.
Oral presentation: “Symplectic Hamiltonian HDG Methods for Linearized Shallow Water Equations”
- April 24–26, 2024 **XXXVI Jornada de Matemática de la Zona Sur**, *Universidad Católica de Temuco*, Temuco, Chile.
Oral presentation: “Symplectic Hamiltonian HDG Methods for Shallow Water Equations”
- January 15–19, 2024 **Workshop on Numerical Analysis of Partial Differential Equations (WON-APDE)**, *Universidad de Concepción*, Concepción, Chile.
Oral presentation: “Symplectic Hamiltonian HDG Methods for Linearized Shallow Water Equations”
- October 10–13, 2023 **XLIX Semana de la Matemática**, *Pontificia Universidad Católica de Valparaíso*, Valparaíso, Chile.
Oral presentation: “Métodos Hamiltonianos Simpléticos HDG para las ecuaciones de aguas poco profundas”
- May 29–31, 2023 **Encuentro Latinoamericano de Estudiantes de Doctorado en Modelamiento, Ingeniería y Ciencias (EMIC)**, *Universidad de Chile*, Santiago, Chile.
Oral presentation: “Symplectic Hamiltonian HDG Methods for Shallow Water Equations”
- November, 14–19, 2022 **XVII Encuentro de Matemática y sus Aplicaciones**, *Escuela Politécnica Nacional*, Quito, Ecuador.
Oral presentation: “Numerical Simulation of Free Boundary Biviscous Fluids”
- September 3–7, 2018 **VI Latin American Workshop on Optimization and Control**, *Escuela Politécnica Nacional*, Quito, Ecuador.
Oral presentation: “Numerical Simulation of Free Boundary Bingham Fluids”
- November, 11th 2015 **III Concurso de Reconocimiento a la Investigación Universitaria Estudiantil – Galardones Nacionales**, Quito, Ecuador.
Oral presentation: “Reducción de un Problema de Control Óptimo usando técnicas POD”

10. Academic Service

- 2026–Present Peer Reviewer, *Journal of Scientific Computing* (Springer Nature).
- 2026 Program Committee Member, *7th International Congress on Education (CIE 2026)*, Universidad Politécnica Salesiana, Ecuador. Responsible for peer review of conference submissions.

2026–Present Academic Reader for Master’s Degree Theses, M.Sc. Program in Pedagogy of Experimental Sciences (Mathematics and Physics), Universidad de Cuenca, Ecuador.

2025 Organizer, Workshop on Applied Mathematics, Pontificia Universidad Católica de Chile, Santiago, Chile. Responsible for scientific coordination, invited speakers, program design, and workshop logistics. <https://appliedmathuc.github.io/workshop-applied-math-2025/>

11. Workshops attended

2023 XXXV Jornada de Matemática de la Zona Sur, Universidad de Concepción, Chile

2023 2nd Chile-Japan Workshop on Mathematical Physics and PDE, Universidad de Santiago de Chile.

2022 Workshop on Scientific Machine Learning: Mathematics and Applications, Santiago, Chile.

2022 Workshop on Minimum Residual and Least-Squares Finite Element Methods, Santiago, Chile.

12. Teaching Experience

2017–2021 **Adjunct Professor**, *Escuela Politécnica Nacional*, Quito, Ecuador.

Courses taught include:

- Numerical Analysis for Partial Differential Equations
- Linear Algebra
- Nonlinear Numerical Analysis
- Calculus of Variations
- Mathematical Modeling with Partial Differential Equations
- Biomathematics

2025 **Teaching Assistant**, *Pontificia Universidad Católica de Chile*, Santiago, Chile.
Teaching assistance in courses of mathematical foundations for artificial intelligence.

2009–2012 **Mathematics Instructor (Teaching Internship)**, *Centro de Formación Artesanal Fiscal “Plan Internacional Programa Bolívar”*, Guaranda, Ecuador.
Taught Mathematics at the secondary education level, 20 hours per week.

13. Professional and Consulting Experience

2017–2017 **Sampling Analyst (Consulting Services)**, *Instituto Nacional de Evaluación Educativa*, Quito, Ecuador.

Development of data-driven methods to support educational evaluation and the design of analytical tools for measuring academic progress.

2014–2015 **Sampling Assistant**, *Instituto Nacional de Estadísticas y Censos*, Quito, Ecuador.
Design and implementation of statistical sampling methodologies for unemployment studies in Ecuador.

14. Early Career Experience

2014 **Undergraduate Intern**, *Escuela Politécnica Nacional*, Quito, Ecuador.

Teaching assistance in Mathematics and Geometry and academic support for undergraduate students.

14. Memberships and Awards

- VRI–UC Research Scholarship, Pontificia Universidad Católica de Chile (2025).
- Gubernamental ANID fellowship for doctoral studies in Mathematics. Chile (2021-2024)
- Member of Sociedad Ecuatoriana de Matemáticas - Ecuador (2015–)
- PIGR-22-03 project grant, awarded by the Vicerectorado de Investigación, Escuela Politécnica Nacional, for research in Mathematical Optimization. (2016-2018)
- EPN fellowship for master studies in Optimization. Escuela Politécnica Nacional. Ecuador (2015-2017)

15. Skills

Comunicación **Languages**, *Spanish: Native*, English: Professional working proficiency.

Programming **Technical Skills**, Python, MATLAB, SPSS, Stata, R/RStudio, C/C++, SQL, SML, Scheme, LaTeX.

Finite **FEA Packages**, *FEniCS*, *NGSolve*.
